

## SUBIRRIGATION: FLOOD FLOOR

**BioTherm Flood Floor** systems save water, conserve energy, reduce fertilizer waste, and reduce labor costs by up to 95%.

- Cross Section: "V" or "W" pattern.
- Flow Pattern: Common fill and drain pipe located along floor valleys.
- Watering Cycle: Floor fills and then drains, and the water is then available for use in next zone.
- Cycle Time: 6-10 minutes (minimum).
- Material: Precision installed structural concrete.
- Containment: Flexible rubber barrier surrounding floor perimeter, allowing for access by employee and cart.
